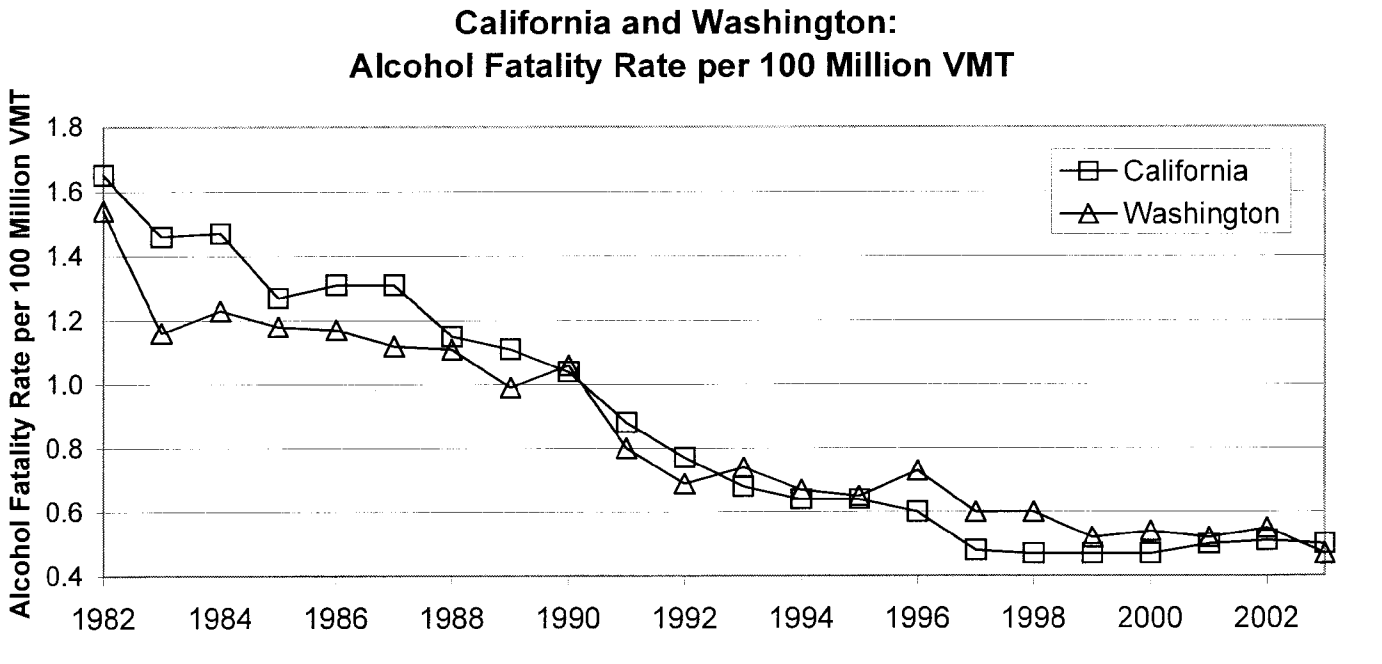
Alcohol Fatality Rates per 100 Million VMT in California and Washington, 1982-2003



Notes:

Data source is DOT HS 809 830 Technical Report "State Alcohol Related Fatality Rates 2003" available from http://www-nrd.nhtsa.dot.gov/pdf/nrd-30/NCSA/Rpts/2005/809830.pdf.

VMT stands for "Vehicle Miles of Travel"

From DOT HS 809 830: "Alcohol related fatalities are defined as fatalities that occur in crashes where at least one driver or nonoccupant (pedestrian or pedalcyclist) involved in the crash has a positive Blood Alcohol Concentration (BAC) value."
